What Are Semantic Analogy Questions?

Semantic analogy questions require candidates to identify the relationship between two words or phrases and then find a similar relationship among options provided. These questions typically follow a pattern: A is to B as C is to D. The challenge lies in understanding the core relationship between the first pair and applying that understanding to the options.

Common Types of Relationships in Semantic Analogies

Semantic analogies can involve various types of relationships, including:

- **Synonym Relationships:** Words with similar meanings (e.g., Happy : Joyful).
- **Antonym Relationships:** Words with opposite meanings (e.g., Hot : Cold).
- **Part to Whole Relationships:** A part related to its whole (e.g., Leaf : Tree).
- **Object to Purpose Relationships:** An object and its function (e.g., Pen : Write).
- **Degree or Intensity Relationships:** Words indicating levels or degrees (e.g., Warm : Hot).
- **Cause and Effect Relationships:** A cause and its effect (e.g., Rain : Flood).

Understanding these relationships helps in identifying the correct answer in analogy questions.
