- Identify students' grasp of communication barriers and effective strategies.
- Promote critical thinking about interpersonal dynamics.

This test acts as a stepping stone, ensuring students are grounded in essential knowledge before progressing into more complex topics.

Content Breakdown and Theoretical Foundations

- Communication Models and Processes

One of the first sections of Test 1 probes students' comprehension of various communication models, such as:

- Linear Model: The basic sender-message-channel-receiver framework emphasizing one-way

communication.

- Interactive Model: Incorporates feedback and context, recognizing communication as a two-way process.
- Transactional Model: Highlights simultaneous sending and receiving, emphasizing the dynamic and ongoing nature of interactions.

Students are expected to distinguish between these models and understand their relevance in different contexts, such as personal conversations versus mass communication.

- The Nature of Interpersonal Relationships

Test 1 emphasizes the importance of relationship development and maintenance, touching upon:

- Stages of Relationship Development: Initiation, experimentation, intensification, integration, and bonding.
- Relational Dialects: Contradictory forces like autonomy vs. connection, openness vs. closedness.
- Attachment Styles and Their Impact: Secure, anxious, avoidant? how these influence communication patterns.

- Perception and its Role in Communication

Understanding perception is crucial for effective interpersonal exchanges. The test covers:

- Perception Checking: Techniques to verify interpretations.
- Selective Perception: How biases influence what we notice.
- Perceptual Barriers: Stereotyping, prejudice, and assumptions that distort understanding.

- Verbal and Non-Verbal Communication

Effective communication hinges on both spoken words and non-verbal cues. The test assesses knowledge of:

- Verbal Strategies: Clarification, paraphrasing, assertiveness.
- Non-Verbal Cues: Body language, facial expressions, gestures, eye contact, proxemics, and

paralinguistics.

Students may be asked to analyze scenarios or interpret non-verbal signals to demonstrate competence.

- Communication Barriers and Strategies for Improvement

Common barriers include language differences, emotional noise, physical distractions, and cultural misunderstandings. Test 1 evaluates students' ability to identify these and suggest strategies such as active listening, empathy, and feedback.

Pedagogical Approach and Question Types

Devito's Interpersonal Communication employs a variety of question formats designed to deepen comprehension:

Relationship Dynamics and Theories

The test explores how relationships evolve and what factors influence their success or failure. It emphasizes the importance of communication competence, emotional intelligence, and conflict resolution.

Example: A scenario might depict a conflict between friends, prompting students to identify the stages of relationship development and suggest communication strategies to resolve the issue.

Perception and Miscommunication

Since perception shapes how messages are interpreted, the test examines techniques for improving perceptual accuracy.

Sample Question: ?Describe a situation where perceptual biases led to miscommunication and propose methods to mitigate this.?
